

Molka GHAMMAM

Software Engineer — Backend Node.js

 Molka-Ghammam |  Molka Ghammam |  ghammammolka185@gmail.com |  +216.51.389.023

SUMMARY

Junior software engineer with hands-on experience building backend services with Node.js and Express, designing MongoDB data models, and integrating secure application services. Comfortable working across full-stack products, from server-side logic and REST APIs to the React.js interfaces that consume them. Looking to contribute to a backend engineering team building reliable, scalable services with strong product impact.

WORK EXPERIENCE

End-of-Studies Internship — Tritux Group — Tunis

Feb 2025 - Aug 2025

- Designed the backend layer of an AI-powered documentation assistant, coordinating code analysis services and generation workflows.
- Implemented secure endpoints for Markdown export, interactive Q&A, and contextual project processing, while supporting the plugin-side user experience.

Engineering Internship — Wind Consulting — Mahdia

Jul 2024 - Aug 2024

- Built the Node.js/Express backend for “Handmade”, an e-commerce platform handling catalog management, orders, user accounts, and core business logic.
- Designed MongoDB schemas, exposed REST APIs, implemented JWT authentication, and contributed to the React.js frontend connected to those services.

Company Immersion Internship — BH Bank — Mahdia

Jul 2023 - Aug 2023

- Gained practical understanding of critical business flows, security constraints, and reliability requirements in a banking environment.
- Strengthened problem-solving skills through exposure to sensitive processing, traceability, and operational control workflows.

PROJECTS

Handmade

- Built a full-stack e-commerce platform with a Node.js/Express backend, MongoDB, JWT authentication, and a React.js frontend for catalog, order, and user account management.

MediColGes

- Developed a hospital management platform with a Node.js/Express backend, MongoDB, role-based access, JWT authentication, and business-facing interfaces for operational data workflows.

CodeScribe

- Designed backend services for contextual code analysis, documentation generation, and interactive Q&A, integrated directly into the plugin interface.

EDUCATION

2020 - 2025 Engineering Degree in Computer Science at **Esprit School of Engineering**

2016 - 2020 High School Diploma at **Rejiche Secondary School, Mahdia, Tunisia**

SKILLS

Technical Skills	Node.js, Express.js, MongoDB, REST APIs, JWT, OAuth 2.0, React.js, Git, MERN Stack, HTML/CSS
Languages	English (fluent), French (fluent), Arabic (native)
Strengths	Problem solving, attention to detail, teamwork, communication
